

Ffuuss Hand Dryer Maintenance Instructions

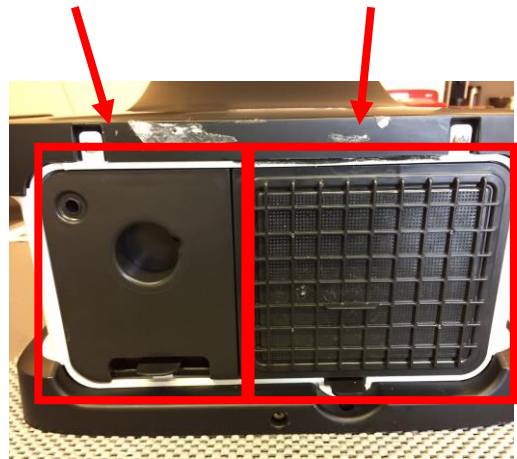

DAILY : Empty the water tray

1. Underneath the machine to the left is the water collection tray.
2. To empty, simply reach to the back and pull tab towards you to release the tray.
3. Once emptied click back into place.

NOTE: If a red dot reflects on the floor under the machine – this indicates the water tray is full and requires immediate emptying.

Water Collection Tray HEPA Filter

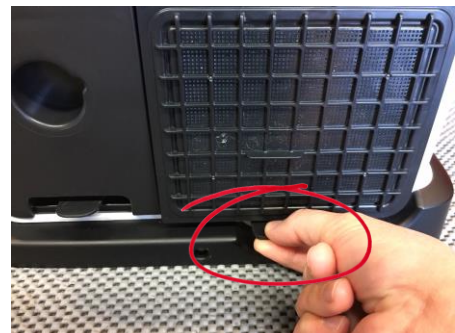

WEEKLY CLEAN

1. **BEFORE YOU START – For easier cleaning turn machine off at the wall.**
2. Wipe out the inside of the drying chamber with a soft damp cloth - Cleaning should be performed using a soft cloth and non-abrasive and non-caustic cleaning fluid to prevent malfunctions or damage to the unit.
3. Use the cleaning brush to remove any residue from the drain hole.
4. Pour half a glass of warm water down the drain hole.
5. **DON'T FORGET to empty the water collection tray again.**

12 MONTHLY : Change HEPA Filter

1. Underneath the machine to the right is the HEPA filter.
2. To remove the old HEPA filter simply reach to the back of the machine and pull the tab towards you to release.
3. Discard old HEPA filter and replace with new HEPA filter.
