

SUPREME

MASTER FLUSH

Sensor Operated
Multi-Feed Option
Battery or Mains Power

**Retrofit or
New Builds**

Upgrade to a non touch, water efficient flush control system that can be retrofitted.

**Made in
New Zealand**

Proudly NZ local with parts supply readily available - QUICKLY without delay.

Customisable

Easy configurable settings allow adjustment of flush cycles and timing to suit application requirements.

**Multi Feed
Option**

Suitable for up to 3 single stall or cistern fed urinals with programmable flush cycles to accommodate all levels of traffic flows.

SUPREME

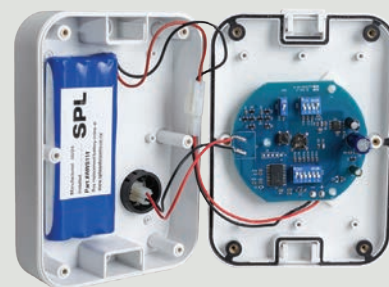

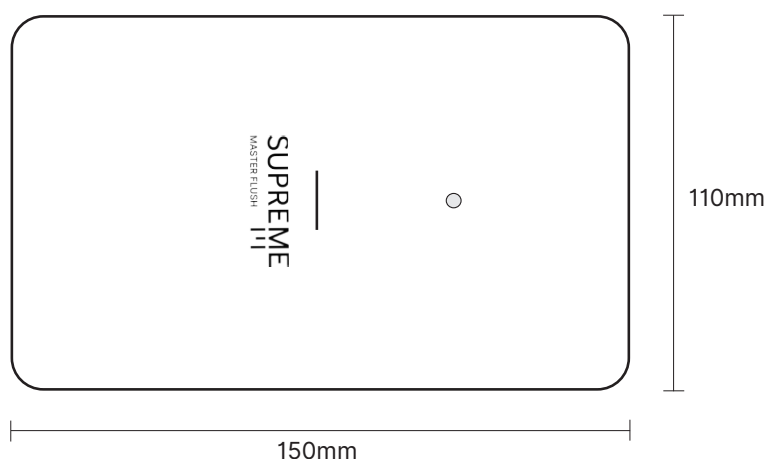

MASTER FLUSH

Maintain hygiene and be environmentally friendly with this leading edge water saving technology.

Touch-free, passive infrared detects and responds to movement to operate flush while a customisable 'Sanitary Flush' maintains hygiene when the bathroom is not in use.

Battery or mains powered, ceiling or wall mounted and with a simple interface, Master Flush offers flexible, reliable control making it a solid solution for maintaining sanitary, water-conscious washroom environments.

Dimensions

(If mains powered)

Specifications

Supply Specification	Sensor unit, battery or mains power pack, 9V latching solenoid, Ballofix valve, sensor to solenoid cable (2m), fixings
Sensor	Passive Infrared (PIR)
Power Supply	9V alkaline battery OR optional 100 - 240V 50/60Hz AC (9VAC/DC 1A regulated power pack)
Colour/Casing	Grey/UV resistant ASA
Solenoid Valve	9V DC latching, 0.2 - 5.0 bar pressure (20 - 500 kPa), Ballofix valve, 1/2" BSP male inlet - 1/2" BSP female outlet (WaterMark approved)
Flushing Duration	Adjustable duration 3 - 300 seconds
Delay Before Flush	60 seconds - 6 hours
Other Flushing Cycles	Pre flush (2 seconds)/Sanitary flush (6 - 24 hours after last activation)
Dimensions	150mm (L) x 110mm (W) x 40mm (D) - sensor 76mm (L) x 55mm (W) x 78mm (H) - solenoid
Water Efficiency	1.9L per flush, per stall
Warranty	12 months
Product Code	AWS400 (battery), AWS400A (mains)
